The book describes the state of the field on different approaches for measuring crime and criminality as seen by prominent scholars in the field. Among the featured contributions are: The Use of Official Reports and Victimization Data for Testing Criminological Theories; The Design and Analysis of Experiments in Criminology; and Growth Curve/Mixture Models for Measuring Criminal Careers. Also included are papers titled: Counterfactual Methods of Causal Inference and Their Application to Criminology; Measuring Gene-Environment Interactions in the Cause of Antisocial Behavior and What Has Been Gained and Lost through Longitudinal Research and Advanced Statistical Models?
