

Hatch-Waxman Act (Intellectual Property Law Series)

THIS CASEBOOK contains a selection of 101 decisions of the U. S. Court of Appeals that analyze, discuss and interpret provisions of the Hatch-Waxman Act. The selection of decisions spans from 2001 to the date of publication. [The] Hatch-Waxman was designed to serve the dual purposes of both encouraging generic drug competition in order to lower drug prices and incentivizing brand drug manufacturers to innovate through patent extensions. To incentivize innovation, Hatch-Waxman grants brand manufacturers opportunities to extend their exclusivity period beyond the standard 20-year patent term: it allows a brand manufacturer to seek a patent extension of up to five years to compensate for time that lapsed during the FDA regulatory process, 35 U.S.C. 156, and an additional six-month period of pediatric exclusivity if the manufacturer conducts certain pediatric studies, 21 U.S.C. 355a. *New York ex rel. Schneiderman v. Actavis PLC*, 787 F. 3d 638 (2d Cir. 2015). In compliance with the Federal Food, Drug, and Cosmetic Act, 21 U.S.C. 301-399f, when a pharmaceutical manufacturer seeks to bring a new drug to market, it must submit a New Drug Application (NDA) for approval by the U.S. Food and Drug Administration (FDA). 21 U.S.C. 355. An NDA must contain scientific evidence that demonstrates the drug is safe and effective, which inevitably requires a long, comprehensive, and costly testing process. *F.T.C. v. Actavis, Inc.*, 133 S. Ct. 2223, 2228 (2013). NDA-approved drugs are generally referred to as brand-name or brand drugs. An approved brand drug enjoys a period of patent exclusivity in the market at the end of which one or more generic drugs, exhibiting the same characteristics as the brand drug, may enter the market at a lower price to compete with the brand drug. [Footnote omitted.] *New York ex rel. Schneiderman v. Actavis PLC*,

ibid., 787 F. 3d 638 (2nd Cir. 2015). Hatch-Waxman also promotes competition from generic substitute drugs. It permits a manufacturer that seeks to market a generic version of an NDA-approved drug to file what is known as an Abbreviated New Drug Application (ANDA). See 21 U.S.C. 355(j); see also *In re Adderall XR Antitrust Litig.*, 754 F.3d 128, 130 (2d Cir. 2014). An ANDA allows a generic manufacturer to rely on the studies submitted in connection with the already-approved brand drugs NDA to show that the generic is safe and effective, provided that the ANDA certifies that the generic drug has the same active ingredients as and is biologically equivalent or bioequivalent to the already-approved drug. 21 U.S.C. 355(j)(2)(A)(iv); see also *Caraco Pharm. Labs., Ltd. v. Novo Nordisk A/S*, 132 S. Ct. 1670, 1676 (2012) (citing 21 U.S.C. 355(j)(2)(A)(ii), (iv)). [Footnote omitted.] *New York ex rel. Schneiderman v. Actavis PLC*, *ibid.* * * *
