

P 38 Automatic Pistol: The First Fifty Years

The P 38 was designed in late 1930 by the Germans, eventually replacing the P 08 Luger in Hitler's German Army. It remains in production today, and its efficiency and durability has influenced the design and construction of countless other military and sporting arms. Now the author traces the origins and development of the P 38 and its near demise. 300 photos.
