

Dead Cell

How would the world be changed if the mentally ill were allowed to determine reality? The Dead Cell explores the experiments of the recently graduated Monica McCoy, and her employment with the secret Dream Research Program at Breckenridge State Hospital. While being briefed on the basics, nothing can prepare her for the horrors she encounters upon reporting for duty. What ensues is a tale of madness, reality, and the supernatural chronicling one woman's journey as she comes face to face with the horror of The Dead Cell.
