

Early New England Potters and Their Wares

This book is the result of more than fifteen years of research. The study has been carried on, partly in libraries and town records, partly by conferences with descendants of potters and others familiar with their history, and partly by actual digging on the sites of potteries. The excavation method has proved most successful in showing what our New England potters were making at an early period now almost unrepresented by surviving specimens. Many of the earliest books, particularly those dating back to the 1900s and before, are now extremely scarce and increasingly expensive. Pomona Press are republishing these classic works in affordable, high quality, modern editions, using the original text and artwork.
