

Hastings Through Time

Hastings and St Leonards, the charming marine resort of fashionable English society, possess attractions and recommendations that render the borough unique and unrivalled among English watering places. Strangers who have not visited the place are liable to be misled by the separate mention of the two names into the idea that St Leonards and Hastings form two separate and independent towns, which in fact they originally were. That stage, however, has long since been passed - The above extract was taken from the 1897 edition of Views and Reviews - Hastings and exemplifies how the town was regarded as a stylish seaside resort by Victorian and Edwardian society. The town eventually lost favour among the wealthier classes, which set in motion a steady decline, only worsened by the onset of the Second World War. But Hastings today is undergoing a process of change and revival; a number of developments have been taking place which are moving the town towards a position in which it is once again unique and unrivalled among English watering places.
