

## Vincent Versaces Welcome to Oz: Lesson 6 - From Oz to Kansas (TUTORIAL DVD)

How to Convert an RGB file to Black and White without ever leaving the RGB color space Lesson 6 of Vincent Versaces Tutorial DVD series. Running time about 60 minutes. Play in your CD ROM drive or any DVD player. This lesson teaches how to convert an RGB file to Black and White replicating the physics of how it would have been recorded if it were actually shot with black and white film. In addition, learn why you should not convert by global desaturation or by doing a classic Black and White conversion only using the luminosity channel. Learn how to convert an image from a spectral approach and not a luminance approach. In this lesson, also learn how to recreate the dynamic range expansion with a two step development process. This lesson is advanced and straightforward. Whether you are a novice, intermediate or advanced Photoshop user, you will find the lessons will accelerate your knowledge to match the quality of your vision. Any of the lessons by Vincent Versace have taken him personally years to discover and develop. They are shared here for you to learn, integrate the knowledge and stimulate your creative process.
