

How to Levitate and Other Great Secrets of Magic

Sri M, the author of the best-seller *Apprenticed to a Himalayan Master: A Yogis Autobiography*, now reveals the age old secrets of magic in *How to Levitate and Other Great Secrets of Magic*. He writes under the pen name James Talbot. A treat for the young and the old. The starlit sky is magical; the silvery moon gliding out of the clouds is magical; the great trees, the beautiful birds, the rain, the earth painted green with lush vegetation, the moving sand dunes in the vast desert, a little child's smile in short, all things in this world conjured up by the invisible hand of the master conjurer are magical. To conjure up something from nothing and make something disappear into thin air is the great art of the magician. Having studied magic under various magicians and researched deep into the subject, I lay bare the secrets of magic for the reader to enjoy. The young and the old love magic and would be delighted to figure out how these mysterious feats are performed on stage. Last but not the least, it would help to steer clear of pretenders who expertly perform magic tricks and claiming that they are miracles, hoodwink the public. The false has to be eliminated before the true is revealed. So read on and mystify your friends by levitating or producing rabbits out of a hat. A treat for the young and the old. James Talbot (Sri M)
