

## 101 Music Practice Tips: Practice Tips for ANY Instrument

After writing the best seller, 101 Piano Practice Tips, parents started asking for another book. A book applicable to ANY instrument--not just piano. So here it is. In this upbeat book, you'll find most of the ideas in my first book, 101 Piano Practice Tips, but it's revised, expanded and updated to include all instruments. It even includes tips from music teachers across the globe. You'll get practice ideas from teachers in the United States, Canada, and even Australia. Whether your child plays the saxophone, the violin, the guitar--any instrument! This is the book for you! So many kids love the idea of playing an instrument, but practicing the instrument? That's not usually at the top of a child's to-do list. And if they do find the time to practice, it's usually because their parent kept nagging them. How frustrating! Music teachers are frustrated too. It's nearly impossible to teach students new concepts when they don't understand the old ones--all because of a lack of practice. If you're a parent in this situation, I have just the solution you're looking for. In this book you'll discover all the tips I've learned during my years of teaching. Fun, practical ways to get your kids to practice their music without nagging. But this book goes one step further. I'll show you easy ways to encourage better quality practice. Even if you've never had a music lesson in your life! Best of all, most of the tips are designed for kids of all ages, with one section devoted specifically to older students. There's even a chapter for what to do if your child wants to stop taking lessons. That's right, there is hope and my book will show you exactly how to get them interested in playing music again. Don't be the kind of parent who sits on the sidelines waiting until their child wants to practice. Music lessons are too expensive for you to let another no-practice day go by. This book is your answer to help your child enjoy playing music again, have good

quality practice and develop a life-long love of music.
