

# Low Budget Shooting: Do It Yourself Solutions to Professional Photo Gear

The serious amateur photographer often faces the problem that even after all the dollars spent on camera, lenses, computer gear, and software, the spending never seems to end. More gear is needed for studio photography, tabletop photography, flash photography, and for accessories here and there. And in many cases, the right accessories are not even available. That is where this book comes in. Low Budget Shooting is the one-stop source where you will find instructions and a shopping list on how to build an array of useful and inexpensive photographic tools. Filled with full-color images and easy-to-follow text, this book shows how to build essential lighting and studio equipment; how to make the perfect light-table for shooting small objects; and how to build reflectors, soft-boxes, and light-tents that really work. It also tells where to get some of the little helpers that make a photographers life so much easier. This clever little book is a creative and valuable resource for most any photographer.
