

Cyber Security

In the UK alone cybercrime costs the economy GBP27billion per year with businesses bearing the lions share at GBP21billion. Major cyber-attacks are now todays most significant risk and ensuring your key decision-makers know the basic principles of cyber-security and attack techniques is your organisations first line of defence. Ark Groups new report Cybercrime: Threats and Solutions is written specifically with the non-technical reader in mind. Using practical examples and easy-to-understand illustrations it outlines the most common cyber-attacks being used today, explains the risks, and demonstrates how to mitigate them and remain secure. Advice is also provided on business continuity and disaster recovery methods that can be implemented immediately in the event of an attack. Key topics covered will enable you to: Understand the impact and risks of cyber-crime on your business; Build the business case for a cyber-security programme; Devise a framework for educating employees as to the importance of cyber security; Design a governance action plan for cyber security; Develop and implement a threat assessment process; and Implement a cyber-crisis response for your organisation. PLUS - Contained within the complimentary CDROM youll find all the checklists featured throughout the report with practical steps to protect your organisation against cybercrime. that may be of interest to you and may pass your details to other companies within the Wilmington Group and selected clients.
