

Help! I Dont Want To Live Here Anymore: True-life situations through which a father tried to help his children.

Not long after my three children went to live with their mother and her boyfriend, they began complaining about the treatment they were receiving in their new home. They and I discussed the different situations and tried to work out ways in which they could make things better. Within this book you will find those situations and the solutions, and though they may not have been completely effectual, at least they gave them some way to deal with what was going on. It is my hope that other dads and moms, or even children experiencing problems at home, may find some help within these pages. I am not a psychologist, merely a father who tried his best to help his children cope with a terrible situation. This books content safe for ages 13 and over.
