

Neurocomic

Do you know what your brain is made of? How does memory function? What is a neuron and how does it work? For that matter, what's a comic? And in the words of Lewis Carroll's famous caterpillar: Who are you? Neurocomic is a journey through the human brain: a place of neuron forests, memory caves, and castles of deception. Along the way, you'll encounter Boschean beasts, giant squid, guitar-playing sea slugs, and the great pioneers of neuroscience. Hana Ros and Matteo Farinella provide an insight into the most complex thing in the universe. Produced in association with the Wellcome Trust, one of the world's largest medical charities. A superb introduction to the complexities of the brain for the layman. High production values, FSC paper stock, and foil embossed cover. Hana Ros, PhD, is a neuroscientist from Oxford University, England. Matteo Farinella, PhD, is an illustrator specializing in graphic journalism and scientific illustration. Farinella received a PhD in neuroscience from University College London in 2013.
