

## Management of Child Development Centers (5th Edition)

In this popular book, Hearron and Hildebrand position the child development program among the key components of a child's ecosystem. They show high-quality children's programs as essential support for a child's family, not as islands of education unconnected to the rest of a child's world. Coverage is clearly based on developmentally appropriate practices and the indicators of quality established by the NAEYC and organized around thirteen core competencies, with a full chapter devoted to each. The book is written in friendly, easy-to-understand language, and bolstered by learning aids, examples, and exercises that capture the reader's attention and keep it. For pre-school teachers and day-care personnel.
