

Sex, Drugs and Techno: A journey to the brink - and beyond

The drug-fuelled dance party (rave) scene has been going on around the world for over twenty years, and is now a regular part of life for countless people, from school kids up to middle-aged adults. It contributes significantly to the social problem of excessive drug use and addiction. The result is a widespread phenomenon of mental and physical damage, with only one avenue for long-term peace available to those who survive the doctors legal drugs. Until now. Hailing from the wrong side of the track his life an aimless mix of violence, petty crime, intoxication and reckless bravado the author, Paul Eldridge, was instantly entranced by the dance party scene. It was love at first sight of the pumping, surreal crowd; love at first bite of a magical ecstasy pill. Just like for so many others, this scene became the driving force in his life the focus of his time, money and lifestyle. He loved it, and it loved him back. Before long, he found himself among the chiefs of the tribe, DJing at major parties in Australia and across Asia. With his music, drugs, sculpted physique and lets party attitude, he had it all. It was the ultimate ride of anyones lifetime, until, like all parties, this one came to an end with an almighty jolt! While on the island of Bali, Paul remembered hearing about a healing practice at the foot of the islands majestic volcano, and he jumped in a taxi and went there. The locals there took him in, and the man who ran it, while knowing nothing whatsoever about Paul, somehow knew exactly what he needed. On that day, Pauls life changed forever. Sex, Drugs and Techno speaks directly to the youth culture of yesterday and of today, in all its hedonism. The authors journey as a former international DJ, convicted drug dealer, and drug user of epic proportions, reaches out to those caught up in that hypnotic world. Faced with the crushing discovery that his drug-induced mental state could

only be healed with medication possibly for life its his incredible, unorthodox healing journey that takes us where countless drug users yearn to be a place beyond the rehab clinics and doctors suites.
