

## Lighting Technology: A guide for the entertainment industry.

Lighting Technology is a comprehensive guide to the basic theory and practice of lighting. It collects together in one volume a wealth of technical detail and reference data for the lighting industry. If you are a lighting practitioner involved with the stage, film, television or still photography you will find this book a handy reference source unrivalled in its scope of information. The authors are eminently qualified to write this book. Brian Fitt spent 13 years in the BBC's Television operation department, followed by 20 years in Planning and Installation department. he was responsible for writing the BBC luminaire and dimmer specifications and is now a technical consultant for international broadcasters. Joe Thornley has worked with all the major lighting manufacturers on numerous projects in television, theatre and film studios and is now a consultant engineer. Formerly Lighting by Design, this book has been completely revised to include: \* the latest advances in lighting technology \* additional information on lighting theory \* up-to-date information on European safety legislation \* greater detail on the control of light \* a new layout making information easier to access Keep this book handy if you are looking for: \* a thorough coverage of the latest equipment \* unique insights into design requirements \* advice on contracts and purchasing equipment \* Brings you up-to-date with the latest safety regulations \* There is also a unique colour filter comparison table including 1000 colour filters from leading manufacturers.
