

The Bear in a Muddy Tutu

Lennon Baggs daughter has been stolen away by his ex-wife, and he's just learned the newspaper he reports for is bankrupt. While on his final assignment, Baggs knocks a policeman unconscious to save the life of a runaway circus bear, and suddenly finds himself responsible for a band of stranded roustabouts who've pitched their tents on a small island along the New Jersey shore. Eight hundred miles away, a young girl searches for her dead father on the beaches of Bermuda. Dead people, after all, become birds as a theory she derived from her mother's explanation that when you die, you grow wings and fly away. A hapless cult leader and the sulking newspaper reporter hatch a plan to save the circus, which includes a plane ride into the Bermuda Triangle accompanied by a man who holds the record for being struck by lightning. And it's starting to cloud up ... /In THE BEAR IN A MUDDY TUTU, hope is something vigorously avoided because it usually means someone is about to be run over by a speeding car.
