

## The Invisible Art

Since the birth of cinema, movie-makers have created stunning special effects by combining still matte paintings with live-action film. Matte painting techniques were closely guarded secrets that never left the studio lot. In this unprecedented retrospective, Mark Cotta Vaz and Craig Barron reveal the history of a visual effect that has defined movies as we know them—from *Gone with the Wind* and *Citizen Kane* to *Star Wars* and *Titanic*. Lavishly illustrated, *The Invisible Art* showcases the finest examples of now-rare matte paintings and unveils a century's worth of fascinating stories, legendary personalities, and cunning movie craft. Including a foreword by George Lucas and a CD-ROM that brings to life these moving pictures, this volume is packed with exclusive interviews and a narrative that time travels from the first pioneering glass shots to the dawn of digital technology. The definitive book for the consummate movie fan, *The Invisible Art* conjures a never-before-told story of film wizardry.
