

# The Golden Honeycomb: A Sicilian Quest

The Golden Honeycomb is today regarded as one of the classic travel books - it is also, forty years after it was written, the indispensable guide to Sicily. The title refers to the golden honeycomb Daedalus is said to have offered to Aphrodite in return for his escape from King Minos of Crete. In his search to discover whether the story was fact or legend, Vincent Cronin travelled throughout Sicily, observing its tombs and temples, its medieval treasures and baroque splendour, its desolate valleys and teeming piazzas, and describes them here with affection and erudition.
