

# Hard Landscape Case Studies: Concept and Construction Detail

This book illustrates, explains and describes hard landscape construction detailing in the context of a wider urban landscape scheme. Ten model schemes have been selected from a variety of types of practices and individual designers to represent a wide range of hard landscape detailing. The model schemes are used as case studies and include brief statement of intent from the designer, numerous photographs, detailed sketches, and annotated sections/plans to illustrate the principles and ideas behind the design and its implementation.
